

Uta Harish Kumar

Vadodara, India | utaharish96@gmail.com | +91 99139 33238 | [LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Final-year B.Tech student with strong foundations in Python, C++, SQL, Data Structures & Algorithms, Object-Oriented Programming, and backend development using FastAPI. Experienced in building REST APIs, scalable software applications, and machine learning systems. Passionate about solving real-world engineering problems and developing reliable software products.

EDUCATION

B.Tech in Artificial Intelligence and Machine Learning — Parul University, Vadodara
Intermediate — Science (MPC) — NRI Institute of Technology, Andhra Pradesh

CGPA: 9.12 | Aug 2023 – 2027
Score: 981/1000 | Jun 2021 – Jun 2023

TECHNICAL SKILLS

Programming	Python, C++, SQL
Core CS	Data Structures, Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems
Backend	FastAPI, REST APIs, API Integration, HTTP, JSON
Databases	MySQL, PostgreSQL
Tools	Git, GitHub, Docker, VS Code, Jupyter Notebook
Libraries	NumPy, Pandas, Scikit-learn
Visualization	Power BI, Matplotlib, Seaborn, Tableau
Machine Learning	Regression, Classification, Random Forest, XGBoost, Feature Engineering, Model Evaluation

TECHNICAL PROJECTS

PhishGuard AI – Python, FastAPI, Scikit-learn, Streamlit, Docker [Live Demo]	2026
- Engineered a full-stack phishing URL detection platform using FastAPI, Streamlit, and Scikit-learn. - Built REST APIs for real-time prediction, batch processing, and model inference while integrating Docker and MLflow for deployment.. - Implemented validation pipelines, automated model training, and API-based inference for production-ready deployment.	
Customer Churn Prediction – Python, Scikit-learn, Streamlit [Live Demo]	2025
- Built telecom customer churn prediction system using Scikit-learn and SMOTE. - Integrated a Streamlit interface for real-time predictions and deployed a complete machine learning pipeline. - Achieved an ROC-AUC score of 0.86 with a production-ready ML pipeline for feature engineering and model evaluation.	
UPI Payment Analytics Dashboard – Power BI, SQL, Excel [GitHub]	2026
- Created an interactive Power BI dashboard analyzing 50,000+ digital payment transactions using SQL and Excel. - Designed KPI dashboards and automated reporting for business insights.	
Insurance Claims Analytics Dashboard – Power BI, SQL, Excel [GitHub]	2026
- Implemented a Power BI dashboard to analyze insurance claims and settlement trends. - Performed data cleaning, SQL querying, and dashboard visualization for business reporting.	

INTERNSHIP EXPERIENCE

Machine Learning Intern YBI Foundation (Remote)	Nov 2025 – Jan 2026
- Developed Python scripts for data preprocessing and workflow automation. - Performed feature engineering and model evaluation using Scikit-learn. - Optimized ML workflows to achieve 92% validation accuracy using advanced feature engineering techniques.	
Data Science Intern Cognifyz Technologies (Remote)	Nov 2025 – Dec 2025
- Executed exploratory data analysis (EDA) across 4 core structured datasets to uncover hidden visual trends using Python and SQL. - Created 5+ analytical reports and visual dashboards to support data-driven decision-making and deliver business insights.	

CERTIFICATIONS

- SQL (Basic) – HackerRank
- Oracle Certified Professional: Data Science – Oracle University
- Python 101 for Data Science – IBM
- Data Visualization Virtual Experience – Tata Group (Forage)
